Phase constraints from the supplied measurements
ν = 0.2
ν = 0.3
ν = 0.5
Lines mark samples, not phase boundaries
Metallic normal transport
Activated normal transport
Insulating; spin relaxation activated
Tc ∈ [1.075, 1.15]
Tc ∈ [0.325, 0.4]
Gapped SC
SC
Unmeasured fillings
No determined phase boundaries
No justified reflection about ν = 1/2.
The high-T STS temperature is unspecified.
Temperature T/D
